Message from the President

Fellow PAC Members,

It's with great excitement that I can announce that we will have a new Board of Directors this next year, with members that have

never served before. Their renewed excitement and vigor will bring new breath to the Club as the current Board takes a well-deserved break.

For a moment, I wasn't sure the Club would last past the end of the year, however, with the onset of the nominations, many members stepped up to the challenge, and will ask, as we did, to please participate in activities, and as always, give them your feedback on what you want to do. I am already hearing great things from them on ideas, etc.

As we close the year, with only two more months to go, there is still a lot of great flying weather to be had. Hard to believe this past weekend was in the 80s. Please take advantage of this great weather, hook up with a friend, fellow pilot, etc. and go somewhere and enjoy the freedom of flight. As well, we still have two more Saturday Breakfast Club Fly-Ins to go, with the next one on Saturday, November 12th.

So....go enjoy the weather, and relish in the ability to fly, it's an unbelievable gift, and I encourage you to use this gift for a great purpose.

Sincerely,

Jon Wells

President, Piedmont Aero Club, 2016

BOARD of DIRECTORS - 2017

Congratulations and sincere thank you to the following members who have stepped up to fill positions and be our new Board of Directors for 2017, starting January 1st:

President: Wes Parker

Vice President: Dr. John Longphre

Treasurer: Bob Boyer

Secretary: LeRoy Walker

Activities: Eric Achen

Did you know?

"With the online weather sources available today, it's easy to skip the phone briefing from Flight Service. What information can I expect to receive in a Standard Briefing from Flight Service? Is there a standard format for the information they provide?"

"The Aeronautical Information Manual (AIM) gives us some great guidance in Chapter 7. You should request a Standard Briefing anytime you are planning a flight and you have not received a previous briefing or have not received preliminary information through mass dissemination media.

The briefer will automatically provide the following information (below) in the sequence listed, except as noted, when it is applicable to your proposed flight.

Once you tell the briefer your specific information (type of flight - VFR or IFR, aircraft number or pilot's name, aircraft type, estimated time of departure), where you are departing from, your intended destination, and altitude - he/she will provide you the following information:

1. Adverse Conditions
2. VFR Flight Not Recommended
3. Weather Synopsis
4. Current Conditions
5. Enroute Forecast
6. Destination Forecast
7. Winds Aloft
8. Notices to Airmen (NOTAMs)
9. ATC Delays

Explanations for all these items are available in the AIM and should be consulted for specific guidance."

NOV

2016
